THE CONTROL OF AMERICAN FOREIGN RELATIONS

By QUINCY WRIGHT, Ph.D.

Associate Professor of International Law, University of Minnesota

In April, 1921, the manuscript of the present work was awarded the Phillips Prize offered by the American Philosophical Society for the best essay on "The Control of the Foreign Relations of the United States." It has been carefully revised and brought up to December, 1921.

The book is an analysis from the point of view of international and constitutional law of the powers and responsibilities of the President, Senate, Congress and the people, in making treaties, in employing military and naval force, declaring and conducting war, recognizing foreign states and governments, and in adding to the territory of the United States. An examination is made of the law and precedents bearing upon the various controversies in connection with the Treaty of Versailles, and the treaties resulting from the conference on Limitation of Armament and Far Eastern affairs. The constitutionality of the League of Nations is particularly considered. Besides the descriptive and analytical content of the book, the author includes a final chapter formulating a number of conclusions as constructive suggestions for improving the American method of conducting foreign relations.

"Infinite Riches in the Little Room of a Single Volume"

H. G. WELLS'

The Outline of History

A one volume educational edition, being the third edition of the original work, revised by the author, and containing all the original illustrations, \$5.00 net. Also in our regular 2 vol. edition, \$10.50 the set.

"Mr. Wells has revised and rearranged his *Outline of History* for this third edition. There must long be a demand for this fascinating and stimulating book. It is a monumental compilation of genius and erudition—an amazing performance even for so prolific, so audacious, so imaginative a maker of literature. He does not deal in dry, perfunctory sentences. The language lives, and sometimes it is like the crack of a whip or the leap of a flame. The man in the street, the average member of the crowd of moiling millions for whom the work is meant especially, will be glad of the reduction of the *Outline* to the compass of a single volume. Wells is not infallible—but he is that best sort of thinker, who makes his reader think."—*Philadelphia Public Ledger*.
